Naval Research Logistics

Contents

Volume 44, 1997

Issue 1, February 1997

Computational Study of the Multiechelon Production Planning Problem
S. Chopra, M.R. Rao, and C.-Y. Tsai 1

Cost-Based Due-Date Assignment with the Use of Classical and Neural-Network Approaches
P.R. Philipoom, L. Wiegmann, and L.P. Rees 21

Towards Finding Global Representations of the Efficient Set in Multiple Objective Mathematical Programming
H.P. Benson and S. Sayin 47

Compromise Allocation in Multivariate Stratified Sampling: An Integer Solution
M.G.M. Khan, M.J. Ahsan, and N. Jahan 69

Replacing Continuous Demand with Discrete Demand in a Competitive Location Model
T. Drezner and Z. Drezner 81

Minimization of Expected Variance of Completion Times on Single Machine for Stochastic Jobs
V.R. Prasad and D.K. Manna 97

Decomposition and Hybrid Simulated Annealing Heuristics for the Parallel-Machine Total Tardiness Problem
C. Koulamas 109

Exact Bayesian Estimation of System Reliability from Component Test Data
J. Tang, K. Tang, and H. Moskowitz 127

Note: Optimal Allocation of Resources to Nodes of Series Systems with Respect to Failure-Rate Ordering
H. Singh and R.S. Singh 147

Issue 2, March 1997

Analysis of Aircraft Sortie Generation with the Use of a Fork-Join Queueing Network Model
D.C. Dietz and R.C. Jenkins 153

Robustness of the Normal Approximation of Lead-Time Demand in a Distribution Setting
J.E. Tyworth and L. O'Neill 165

A Dynamic Model for Component Testing
İ.K. Altınel and S. Özekici 187

Warranty Policies and Burn-in
J. Mi 199

A Generalized Johnson's Rule for Stochastic Assembly Systems
R. Righter 211

Note: Dynamic Lot Sizing for a Finite Rate Input Process
R.M. Hill 221

Issue 3, April 1997

Multiple-Facility Loading Under Capacity-Based Economies of Scope
J.B. Mazzola and R.H. Schantz 229

Joint Determination of Preventive Maintenance and Safety Stocks in an Unreliable Production Environment
K.L. Cheung and W.H. Hausman 257

A Heuristic Algorithm for Determining Replacement Policies in *k*-Out-Of-*n* Systems
C.-S. Chung and J. Flynn 273

Heuristics for Multimachine Minmax Scheduling Problems with General Earliness and Tardiness Costs
A. Federgruen and G. Mosheiov 287

Issue 4, June 1997

In Memoriam: Laurence Alan Baxter v

Optimizing Submarine Berthing with a Persistence Incentive
G.G. Brown, K.J. Cormican, S. Lawphongpanich, and D.B. Widdis 301

Demand Shuffle—A Method for Multilevel Proportional Lot Sizing and Scheduling
A. Kimms 319

Polynomial Algorithms for Center Location on Spheres
M. Jaeger and J. Goldberg 341

On a Ruckle Problem in Discrete Games of Ambush
A.Y. Garnaev 353

Heuristic Scheduling of Resource-Constrained Projects with Cash Flows
R. Padman, D.E. Smith-Daniels, and V.L. Smith-Daniels 365

A Markovian Model for Process Setup and Improvement
L. Gong, J. Pruett, and K. Tang 383

Issue 5, August 1997

Minimum Cost Component Test Plans for Evaluating Reliability of a Highly Reliable Parallel System
J. Rajgopal and M. Mazumdar 401

Efficient Methods for Sequencing Minimum Job Sets on Mixed Model Assembly Lines
A. Bolat 419

Markov Decision Processes with Restricted Observations: Finite Horizon Case
Y. Serin and Z.M. Avsar 439

Stock-Rationing Policy for a Make-to-Stock Production System with Two Priority Classes and Backordering
A.Y. Ha 457

Meeting Seasonal Demand for Products with Limited Shelf Lives
D.C. Myers 473

Routing in Packet-Switched Communication Networks with Different Criticality Classes of Communicating Node Pairs
A. Amiri and H. Pirkul 485

Attrition Modeling in the Presence of Decoys: An Operations-other-than-War Motivation
D.P. Gaver and P.A. Jacobs 507

Issue 6, September 1997

Acceptance Sampling, Imperfect Production, and the Optimality of Zero Defects
S.A. Starbird 515

Scheduling Stochastic Jobs with Asymmetric Earliness and Tardiness Penalties
X. Cai and S. Zhou 531

Algorithms for Computing Waiting Time Distributions under Different Queue Disciplines for the D-BMAP/PH/1
I. Frigui, A.S. Alfa, and X. Xu 559

Cyclical Schedules for the Joint Replenishment Problem with Dynamic Demands
I.R. Webb, B.R. Buzby, and G.M. Campbell 577

Variable Sampling Plans for Normal Distribution Indexed by Taguchi's Loss Function
I. Arizono, A. Kanagawa, H. Ohta, K. Watakabe, and K. Tateishi 591

Note: Minimizing the Variability of the Waiting Times in a Globally Gated Elevator Polling System
L.A. Baxter, F. Harche, and U. Yechiali 605

Issue 7, October 1997

Optimality of the Greedy Shooting Strategy in the Presence of Incomplete Damage Information
G. Manor and M. Kress 613

Testing or Fault-Finding for Reliability Growth: A Missile Destructive-Test Example
D.P. Gaver and P.A. Jacobs 623

Optimal Nonmyopic Gambling Strategy for the Generalized Kelly Criterion
S. Cetinkaya and M. Parlar 639

A Nonparametric Bayes Approach to Decide System Burn-In Time
W.-T. K. Chien and W. Kuo 655

Average-Case Analysis of the Bin-Packing Problem with General Cost Structures
J. Bramel, W.T. Rhee, and D. Simchi-Levi 673

An Engagement Model To Optimize Defense Against a Multiple Attack Assuming Perfect Kill Assessment
B.U. Nguyen, P.A. Smith, and D. Nguyen 687

Issue 8, December 1997

The Effect of Training Data Set Size and the Complexity of the Separation Function on Neural Network Classification Capability: The Two-Group Case
M. Leshno and Y. Spector 699

Labor Staffing and Scheduling Models for Controlling Service Levels
G.M. Thompson 719

An Application of the MTP_2 Property on Bounds on System Reliability
J. Gåsemyr and B. Natvig 741

A Dynamic-Programming Approach to Continuous-Review Obsolescent Inventory Problems
I. David, E. Greenshtein, and A. Mehrez 757

Strong Turnpike Policies in the Single-Item Capacitated Lot-Sizing Problem with Periodical Dynamic Parameter
S. Bylka 775

An Optimal Recursive Method for Various Inventory Replenishment Models with Increasing Demand and Shortages
J.-T. Teng, M.-S. Chern, and H.-L. Yang 791

Appreciation to Referees 807
